

HOME LEARNING

MAKER MAT

**Please return your completed activities
by Monday 21st May**

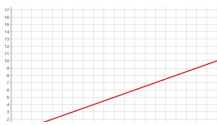

Select a plant at home or in the park. Each week measure, observe and record how it grows and changes. Draw diagrams or take pictures to illustrate your report.

Create a model or diagram explaining pollination.

Draw, paint or make a collage of your favourite plant, tree or garden. Write some sentences about why it is so important to you.

Create a graph showing the growth of your plant.

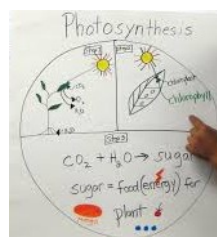

Year 5

Plant an indoor garden, choosing plants that are adapted for hot and dry environments.

Think of a scientific question related to plants that you want to investigate. Write up your question and the method of how you would investigate

Create a model or diagram explaining photosynthesis.

Invent a creature that has adapted to live on the moon. Create a picture or model and label the adaptations.
