MAT

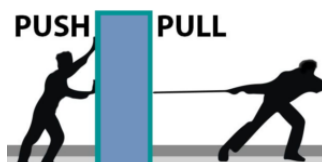

Design and make your own game that uses pushes and pulls.

Create your own movie demonstrating some of the push and pulls you know.

Make your own paper bag kite! Take photos to show us how

Think about your journey to school, list or draw the moving things you see.

Can you investigate ways to make some of your toys float on water?

Use magnets to investigate things in your home that are magnetic.

Can you bring in any toys that push or pull to 'show and tell'?

Investigate what things move by squeezing the air from a bottle.
